

City Approved Backflow Testers

Please email test results to backflows@clermontfl.org

Listed below are backflow testers who have the required certification on file with the City of Clermont. The testers are not employed by the City of Clermont, nor does the City assume responsibility for or recommend any particular tester. This list is provided only as a courtesy.

You may use a tester not listed provided they are certified by the University of Florida TREEO Center, the American Water Works Association (AWWA), or the Florida Water & Pollution Control Operators Association (FW&PCOA). For testers not listed, you are required to submit copies of the tester certification and equipment calibration with your test results to be accepted as complete.
