

Mad Science is excited to partner with the Clermont Arts and Recreation Center this summer to bring your child a week full of fun learning!

Your child will become a junior scientist for the week, having the opportunity to experience real, live science by building bridges, solving mysteries, flinging catapults, making solar nachos, launching rockets, building robots, and many other stellar experiments! The selection of activities will make your head spin! Children will design, create, build and assemble a variety of interesting projects and will take at least one phenomenal project home every day.

Registration will be at the
Clermont Arts and Recreation Center.
